SUMMARY

Results-driven Data Analyst with 3+ years of experience engineering ETL pipelines, building scalable dashboards, and translating large-scale data into actionable insights using SQL, Python, Power BI, and Tableau on Snowflake, pursuing an MS in Business Analytics and AI (UT Dallas, May 2026).

EDUCATION

The University of Texas at Dallas

M.S., Business Analytics and AI | GPA: 3.65/4.0

Dallas, TX

Aug 2024 – May 2026

Bharati Vidyapeeth's College of Engineering

B.E., Electrical and Electronics | GPA: 3.4/4.0

India

Aug 2019 – May 2023

SKILLS

Programming & Tools: SQL, Python, R, Advanced Excel (Pivot Tables, VBA), Power BI, Tableau, Salesforce

Data Engineering: Snowflake, MySQL, PostgreSQL, ETL Pipelines, Data Modeling, Data Quality Frameworks

Analytics & BI: Statistical Analysis, A/B Testing, KPI Design, Forecasting, Dashboard Development, Machine Learning

PROFESSIONAL EXPERIENCE

Veracyte

Data Analyst Intern

San Francisco, CA

Aug 2025 – Nov 2025

- Engineered a Snowflake data mart consolidating 2M+ claims and billing records, improving KPI accuracy across denial management, reimbursement tracking, and turnaround time for 4 operational teams
- Built 5 Power BI and Tableau dashboards tracking denial rates, payer mix, and aging buckets using DAX measures, reducing manual reporting time by 20% and delivering real-time visibility to leadership
- Designed and executed SQL pipelines to validate and reconcile data across 3 source systems, eliminating mismatches by 30% and strengthening data integrity for downstream analytics
- Implemented 8 automated quality checks with real-time anomaly alerts, cutting root cause analysis time and improving payment reporting accuracy across billing workflows
- Synthesized weekly revenue cycle metrics for operations leadership, enabling data-driven prioritization of payer escalations and claim resubmission strategies

Elite Marque

Data Analyst

New Delhi, India

Jun 2021 – Jun 2024

- Standardized and transformed 80K+ records across 4 business units using Python and SQL, reducing reporting errors by 35% and improving data consistency for analytics consumption
- Architected automated Power BI and Excel dashboards with 20+ dynamic visualizations, cutting manual reporting effort by 25% and accelerating trend identification for senior stakeholders
- Delivered weekly and monthly performance analyses translating raw operational data into measurable business insights, supporting strategic decisions across revenue and operations functions
- Diagnosed and resolved 3 critical data pipeline gaps impacting downstream reporting accuracy, collaborating with operations teams to remediate upstream data entry issues

PROJECTS

Automobile Price Prediction and Customer Segmentation | Python, SQL, Scikit-learn

- Built an ensemble model using Random Forest and Gradient Boosting on 800K+ records, achieving 96% prediction accuracy to support data-driven pricing and revenue optimization
- Applied K-Means and Hierarchical clustering for customer segmentation, improving targeting accuracy by 30% through feature engineering, data cleaning, and iterative model tuning
- Translated model outputs into actionable pricing tiers and segment profiles, enabling stakeholders to quantify revenue impact and personalize offerings across customer cohorts

Az National Trucking – Hadoop, Hive & Tableau Big Data Analytics | Hadoop, Hive, Impala, Tableau

- Ingested 8,000+ geolocation records and a 100-driver fleet dataset into HDFS using Cloudera Hadoop (HDP), created Hive tables via DDL, and queried data through Apache Impala connected to Tableau via ODBC driver for large-scale operational analytics
- Built interactive Tableau dashboards analyzing unsafe driving events across 100 drivers and multiple truck models, identifying geographic hotspots and risk scores through behavioral analysis to surface key predictors of fleet safety and fuel efficiency
- Delivered data-driven recommendations for route optimization and driver coaching, translating complex geospatial and behavioral patterns into actionable fleet performance insights for operational stakeholders
