

SUMMARY

Data and Business Analyst with 3+ years of experience across operations, marketing, finance, and revenue reporting, building the data infrastructure businesses rely on and delivering insights that drive real decisions. Designed Snowflake pipelines, ML models with 96% prediction accuracy, and Power BI and Tableau dashboards that have measurably reduced reporting effort, improved data quality, and sharpened how teams plan, price, and perform.

TECHNICAL SKILLS

Programming & Data Engineering: SQL (Complex Joins, Window Functions, CTEs, Query Optimization), Python (Pandas, NumPy, Scikit-learn), R, ETL Pipelines, Data Cleaning, Data Modeling, Git, Jupyter Notebook

BI & Visualization: Power BI (DAX, Power Query), Tableau, MS Excel (XLOOKUP, Pivot Tables, VBA Macros), Salesforce

Analytics & Statistical Methods: A/B Testing, Hypothesis Testing, Time Series Forecasting, Customer Segmentation, Cohort Analysis, Predictive Modeling, Machine Learning (Random Forest, Gradient Boosting, K-Means), KPI Design, Data Storytelling

Databases & Platforms: Snowflake, PostgreSQL, MySQL, Hadoop (Hive, Impala), n8n Automation, Generative AI Tools

Certifications: AWS Certified Cloud Practitioner, Google Data Analytics, Intermediate R

EXPERIENCE

Davidson Gundy Alumni Center, UT Dallas

Dallas, TX

Business Analyst (Co-op)

Jan 2026 – May 2026

- Built Python-based ETL pipelines to extract, clean, and standardize 10,000+ alumni records from LinkedIn profile exports, improving dataset accuracy by 30% for advancement reporting
- Identified unindexed joins in legacy Microsoft Access databases and rebuilt query logic, improving query performance by 40% and accelerating report delivery for the operations team

Veracyte, Inc.

San Francisco, CA

Data Analyst (Co-op)

Aug 2025 – Nov 2025

- Collaborated with revenue cycle, billing, payer relations, and finance teams to design a unified Snowflake data mart consolidating 2M+ medical claims records from 3 source systems, establishing a single source of truth for revenue cycle reporting
- Implemented 8 automated SQL-based validation rules with threshold alerts across 3 source systems, improving data reliability by 30% and ensuring HIPAA-regulated claims data reached leadership dashboards clean and anomaly-free
- Deployed 5 interactive Power BI and Tableau dashboards with reusable DAX measures tracking denial rates, payer mix, and AR aging, reducing manual reporting effort by 40% for revenue cycle leadership
- Automated weekly revenue cycle report summaries by integrating Python with generative AI to translate raw Power BI KPI outputs into narrative leadership briefs, reducing report preparation time by 50%

Elite Marque

Delhi, India

Data Analyst

Jun 2021 – Jun 2024

- Standardized 90,000+ customer and sales records across 4 business units using reusable Python and SQL pipelines for ingestion, deduplication, and transformation, reducing reporting errors by 35%
- Built automated Power BI and Excel dashboards with 20+ dynamic visualizations tracking sales performance and revenue trends, reducing manual reporting effort by 25% for senior stakeholders
- Diagnosed 3 critical pipeline failures across 4 business units, traced root causes to upstream data entry gaps, and implemented standardized templates and validation checks at source, improving data quality by 30%
- Analyzed revenue and churn trends across 4 business units using EDA, identified pricing and marketing gaps, and presented findings in monthly leadership reviews, driving 15% revenue growth across client accounts

PROJECTS

Automobile Price Prediction and Customer Segmentation

- Developed a Random Forest and Gradient Boosting ensemble on 800,000+ records to resolve inconsistent pricing and undefined customer segments, achieving 96% prediction accuracy and improving targeting precision by 30% through K-Means clustering

Az National Trucking: Big Data Governance Pipeline

- Built a big data governance pipeline for a trucking company lacking centralized visibility across 100+ drivers, loading 8,000+ GPS records into Hadoop with Hive and Impala, and building Tableau dashboards that reduced route time by 12%

EDUCATION

Bharati Vidyapeeth's College of Engineering

Aug 2019 – June 2023

B.Tech., Electrical and Electronic Engineering

The University of Texas at Dallas – Naveen Jindal School of Management

Aug 2024 – May 2026

M.S., Business Analytics and Artificial Intelligence
